Can't find your appliance use and care guide? Enter your model number above to find owner manuals for Whirlpool® washers, dryers, dishwashers, refrigerators, freezers, ice makers, ovens, ranges, stovetops, microwaves, and more. Whirlpool® manuals can help you get the most out of your appliance, and provide important information about parts and accessories. Downloading an official Whirlpool® manual from our website is also a convenient way of obtaining a back-up in case your original document goes missing. For help with Whirlpool® troubleshooting, service or How To guides, visit the Whirlpool Customer Care portal. Item added to the compare list, you can find it at the end of this page So your Whirlpool Duet washer is out of order? The good news is Whirlpool Duet washing machines have a diagnostic mode to help troubleshoot what's the problem with your washer. Here's the tricky part... There have been several washing machines that Whirlpool has chosen to name Duet. This Duet washer repair guide is for the latest belt-drive version of the Duet washer. Links to repair guides for other Duet washer versions can be found below This Duet Washer repair guide is for the following core washer models:WFW9200, WFW9300, WFW9400, WFW9410, WFW9450,WFW9451, WFW9470, WFW9500, WFW9550, WFW9600, WFW9630, WFW9640, WFW9700, WFW9750 For Newer Duet Direct Drive Washer Models Older Duet Washer Models Starting With GHW Unplug the washer for 30 seconds to attempt to reset the Duet washer control. Attempt a Duet Washer Quick Diagnostic Test Does The Washer Have Power? => No Look at "Duet washer won't turn on" (one up) Try manually turning the washer's inner drum and listen for anything that may be stuck between the washer's inner and outer tubs. If you are hearing an even grinding noise coming from the back of the washer, you may have a bad main bearing. This is a fairly common problem with front load washing machines. It is also a very difficult and expensive repair. If the washer is out of warranty but still fairly new you may want to try contacting Whirlpool... Whirlpool Washer Complaints Unplug the washer for 30 seconds to attempt to reset the Duet washer control. Attempt a Duet Washer Quick Diagnostic Test Check the Duet door lock. (Duet Door Lock Check) Unplug the washer for 30 seconds to attempt to reset the Duet washer control. Attempt a Duet Washer Quick Diagnostic Test => Washer will not do a Duet Washer Quick Diagnostic Test You can manually unlock the washer by removing the top (remove screws on the back of the top panel and slide the top panel back to lift off, then with the washer unplugged reach down and pull a small ring on the top of the door lock to manually open the door lock. Check the Duet door lock (Duet Door Lock Check) Start with the easy stuff... Unplug the washer for 30 seconds to attempt to reset the Duet washer control. Check your home water valves if your fill hoses have a flood stop check valve turn the water off, disconnect the hoses and run a little water into a bucket. Then reconnect the hoses to your washer and do a Duet Washer Quick Diagnostic Test. Check the Duet water valves (Duet Washer Valve Check) Duet Washer's Drum Won't Rotate Duet Washer Leaking The most common cause of a Duet washer leaking is a hole in the washers door boot / bellows. However, a leak can come from many of the washer's parts, the best way is to narrow your problem down... is it leaking all the time, even when the washer is off? (valve or water supply) or only when the washer is running? (hose, drain pump, door boot / bellows) Visually inspect the washer for the source of the leak... be careful of moving parts that may remove your parts! Duet Washer Vibration Make sure your Duet washer is on solid footing... can you rock the washer by pressing on one of the corners. (adjust the washer legs) Does the washer go out of balance EMPTY during a Duet Washer Quick Diagnostic Test? No => What if you have a heavy load of like items (all towels on a short normal cycle? If it can balance an all towel load, your problem is probably load related. (Read the users manual) If it is off balance empty or the all towel load went off balance move to step #3. Press down on the inner drum and feel for a popping movement (The inner drum support may be broken... this is bad) Try rotating the drum a few degrees and try several times... the inner and outer drums should move together as a unit. Sometimes the three point support that suspends the inner drum inside the outer drum can crack. If there is movement you may need a new inner wash drum. Unplug the washer and remove the back panel to check the tub shocks. They should all be attached. If all that checks out your probably safe to replace the washer's shocks. Duet Washer Not Cleaning Well Your washer can get extremely nasty inside in places you can't see.

Try leaving the door open a crack when the washer is not in use and make sure to use the Clean washer cycle from time to time. Run a Duet Washer Quick Diagnostic Test and make sure that the washer is mechanically working correctly. If it is then you may want to try a different detergent. Stinky Duet Washer Whirlpool has made big improvements with the new Duet washers to reduce odors with an improved venting system. However, the clean washer cycle is there for a reason! Your washer can get extremely nasty inside in places you can't see. Try leaving the door open a crack when the washer is not in use and make sure to use the Clean Washer cycle from time to time. Duet Washer Won't Drain The most common Duet washer problem Unplug the washer for 30 seconds to attempt to reset the Duet washer control. Enter the Duet Washer Diagnostic Mode and check for error codes. If your Duet washer has an F21 error code (long drain) you may want to skip passed all the fill steps to step C06 (to test the drain pump.) After the door locks (C00) You can skip forward to test the drain pump by pressing the same button you chose to start the diagnostics. The best way I have found to deal with the water when your washer's drain pump isn't working is to use a shop-vac and pull from the drain hose. If that works the your pump is highly suspect. If it doesn't work then you almost certainly have a clog in your Duet washer's drain system and the pump may be fine. If you can hear that the pump is trying to drain, you know it's getting power from the Duet control like it should. Remove the pump and check for blockages. If the drain pump is not even trying to run you will need to check power supply to the pump for 120VAC when it should be draining. at the Duet control's DP2.2 connection and at the drain pump. Common element fee, \$300 per month to cover insurance and snow removal. PROPERTY DETAILSThe area offers its residents a combination of a quiet neighborhood with an urban lifestyle. The neighborhood houses great fine-dining and casual restaurants on Yonge Street as well as patios, cafes, bars and shops. Of course there's the historical train station, now Summerhill LCBO, the best in the city. For a quick ride downtown, residents can get on the subway at the Summerhill subway station. The Rosehill Reservoir Park is located east of Yonge Street, with access from Summerhill Gardens. The lower portion of this park features a foot path that is used by walkers, joggers, and cyclists. The north-east corner of this path leads to the David A. Balfour Park, a nature trail that winds through the Vale of Avoca Ravine. The upper portion of the Rosehill Reservoir Park includes a children's playground, a wading pool, a waterfall, and reflecting pools. Lionel Conacher Park, situated off Birch Avenue, is a memorial to Lionel Conacher, Canada's athlete of the first half of the twentieth century. WALKABILITY 22 Birch Avenue has a walk score of 94 out of 100. This location is a walker's paradise so daily errands do not require a car. It's a 4 minute walk to the Summerhill Station. Bike score 84, flat as a pancake! Transit score of 91. ACCESS Avenue Road and Yonge Street at your doorstep will get you to the financial district in 15 minutes or up to the 401 in 15. The DVP is about 10 minutes away, giving you easy access to the 400 series of highways, cottage country and eastern points of interest. When you prefer to leave the car at home, TTC bus routes and the subway line are just steps away.
